

**CLAIM:**

Floss in the cap relates to a dispensing devices. And more particularly to a cap for toothpaste and other containers, serving as a dispenser with special thread or yarn. The thread/yarn has herbal coating to whiten and clean between the teeth. The thread and yarn (floss) incorporated with camellia seed oil, which whitens in between teeth while removing food particles from under the gum. This special floss will also break the plaque to teeth. This Invention unlike ordinary floss attaches to the tubes, bottles, or other dispensers.
